

WE'RE HIRING!

Quality Assurance Specialist

As a QA & Testing Specialist you are have to drive the test strategy and plan, including the test preparation, execution, analysis and reporting activities and test cases for projects as well. You will be responsible for creating all the validation documentation and also for validation and integration of Trencadis products and services

Responsibilities

- You will be working closely with the product owner/project manager and the delivery team
- Functional testing, bug management, reporting
- Analyzing and estimating the testing efforts
- Proactively bringing issues and problems to the attention of the team; generating, proposing and implementing innovative solutions to solve them
- Analyze functional specifications of information systems
- Define test scenarios, test cases and prepare test data for specific situations based on analysis of requirements and design/system documentation
- Responsible for validation of the implemented features, ensuring that they match the requirements
- Execute test cases and report the results
- Ensure defects are clearly and concisely documented
- Collaborating with team members, sharing knowledge with others

Must have technical knowledge and qualification

- BS in Computer Science or related technical field or equivalent practical experience
- **At least 3** years of prior work experience in the field of testing or QA
- Familiar with software testing methodologies, processes and tools
- Real experience with manual testing is a must, experience with automated testing is a plus
- Ability to write and run basic SQL queries is a plus
- Good command of English (both written and spoken)
- Knowledge of Jira, TestRail or equivalent

Nice to have experience

- You have experience with Postman or other API clients
- Ideally, you have experience with Selenium and Python
